DETAILED ACTION

1. This office action is in response to applicant's response filed on 02/17/2009.
 2. Claims 1-3, 5-10, 12, 13, 15-21, and 24-27 are pending.
 3. Claims 4, 11, 14, 22-23 and 28-38 are cancelled.
 4. Applicant's arguments have been fully considered.
5. In view of the Appeal Brief filed on 02/17/2009, PROSECUTION IS HEREBY REOPENED. A condition of allowance is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

/Kambiz Zand/

Supervisory Patent Examiner, Art Unit 2434.

Response to Arguments

1. Applicant's arguments are persuasive in the light of Applicant Amendment.
Therefore the rejections of claims have been withdrawn.

Allowable Subject Matter

1. Claims 1-3, 5-10, 12, 13, 15-21, and 24-27 (renumbered as 1-22) are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reasons for the allowance of the independent claims 1, 12, 21 and 27 are directed:

an interface coupled to the bus, the interface being adapted to receive information from (1) a sender of the digital content and (2) either a server controlled by a supplier of the digital device or a trusted third party, the information received by the interface from the sender comprises a mating key generator being a message that comprises an identifier of the supplier; and

a non-volatile storage unit coupled to the bus, the non-volatile storage unit to store a mating key lookup table to identify either the server controlled by the supplier of the digital device or the trusted third party, based on the information received from the sender, from which the at least one mating key is supplied, the mating key lookup table stored by the non-volatile storage unit comprises (i) a first group of entries forming a

range of mating key generators for digital devices supplied by each supplier of a plurality of suppliers including the supplier, and (ii) a second group of entries corresponding to the first group of entries, each entry of the second group of entries including at least one mating key uniquely corresponding to and formed by at least a portion of one of the mating key generators.

However, the cited reference, Wasilewski US Patent No. 6,157,719, does not disclosed or suggested: a mating key lookup table, non-volatile storage unit, the mating key generator being a message that comprises an identifier of a supplier of one of the digital devices and the mating key generator undergoing a hash operation to produce the requested mating key and

receiving a serial number being used to locate an one-time programmable value, computing a mating key by performing a computation on the mating key generator and the one-time programmable value to produce the mating key, and outputting the mating key based on the mating key generator being a message including at least one of (i) a first identifier to identify a manufacturer of the digital device, (ii) a service provider identifier, [(iii) a conditional access provider identifier,] and (iv) a mating key sequence number

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.
